

SIMS Luchtime Seminar Series & Topics in Australian Marine Science Seminar Program

Seminar Series 1:15 – 2:15 pm, Lecture Theatre Building 21 Sydney Institute of Marine Science Chowder Bay Road Mosman	
28 February 2019	Marine Microbes around Australia Professor Justin Seymour, University of Technology Sydney
7 March 2019	Using Emerging Technologies to Study Whales Dr Vanessa Pirootta, Marine Predator Research Group, Macquarie University
14 March 2019	Research at SIMS Four speakers from the SIMS research team will talk about their work on the World Harbour and other Projects
21 March 2019	Ecological dynamics of corals at their high-latitude range limits Dr Brigitte Sommer, The University of Sydney
28 March 2019	Mesoscales eddies in the East Australian Current System: diagnosis, characteristics, and impacts on the oceanic environment Dr. Paulina Cetina Heredia, University of NSW.
4 April 2019	Methods and Practices to Restore Coastal Intertidal Ecosystems Associate Professor William Glamore, University of New South Wales
11 April 2019	Why understanding sediment geochemistry is relevant to climate reconstructions Dr April Abbot, Macquarie University
18 April 2019	Reef Management Associate Professor David Suggett, University of Technology
25 April 2019	Break (Anzac Day)
2 May 2019	Ecology of Coastal Tropical Sharks Dr Peter Yates, Sydney Institute of Marine Science
9 May 2019	The IMOS larval fish monitoring; and a vision for targeted restocking of the coastal ocean via frontal eddies Professor Iain Suthers, University of New South Wales
16 May 2019	Professor Elaine Baker, The University of Sydney
